emancipated, and none of the old tradition undert. There was no presentent to follow many laws for himself. He is a wonderfully bright and precorious little fellow, and his of birth and consciousness of station and power of a man of 60. His eyes are not siantancse face the wonderfully oblique eyes beloved of the caricaturists. The peculiarity in the expression of their eyes is given by the eyelids being fastened in either corner, as if a few stitches had been taken there. This makes it impossible for them to lift the eyelids as high as we do, and gives the narrow slits, through which they gaze, the peculiar

Oriental look

One often sees Japanese with as round, wide open eyes, as those of our race, and it gives an especial leauty to their countenances. Prince Born has the exquisitely emooth, fine yellow skin that is one of the points of greatest beauty in Japanese chil-dren, and a bright color sometimes shows in the pale yellow of his little checks. He has the rank of a colone in the Japanese array, and wears his military uniform and his cap with the gold star all the time, his clothes being dark blue cloth in winter and white duck its summer. He is fond of riding, and when mounted, the miniature colonel trots along at a fine gait, giving and returning the military salute as he passer in officer or a sentry like a young martinet.—8t. Nicholas.

The Watch of Three Dials.

John W. Davis, an Alabana watchmake has applied for protection at the patent officer a watch with three distinct movemen. and dials. This novel device is designed for the use of railroad engineers and conductors. Three separate sets of machinery are to be Three separate sets of machinery are to be inclosed in one case, with one face upon which three dials will appear. The probable importance and value of the thing can be best indicated by the relation of an actual occurrence. On the Memphis and Charleston railroad a few years ago two trains collided, killing two men and burning up a large quantity of oil and other valuable freights. The cause was that an extra coll of the hair spring of the watch of one of the conductors, because entangled with the regulator, can ing the crippled timepiers to run so much faster than usual as to gain twenty minutes in one hour. The bearer of the watch is consequence increased the speed of his train, and so interpretedly met a train at an unmanal place. Dayle project is to furnish three watches in one case regulated to run
